***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Tucker (2004/0135041) (filing date 12/22/03).

Tucker discloses what could be termed a folding saw horse apparatus comprising: a pair of saw horse sides 12/24, each one of the saw horse sides providing a pair of spaced apart saw horse legs 18/30 and 14/26, an upper horizontal strut 48 and a medial horizontal strut 54; the upper saw horse strut engaged at opposing ends thereof with each one of the saw horse legs by one of a pair of metal formings 270; opposing ends of each of a pair of flexible straps 54 engaged with the metal formings 52 as a hinge; the medial horizontal strut 54 secured to the saw horse legs on each of the saw horse sides by a further pair of metal formings 52; the medial horizontal struts joined by a pair of rigid spreader struts 37/39 engaged with a spreader strap via legs, ends of the spreader strap 54 engaged with the medially horizontal struts of the opposing saw horse sides; whereby, with the saw horse sides spread fully apart the spreader struts are
